

OpenAI Uploaded-File Smoke PDF

Document Type: Trade Confirmation

Counterparty: ACME Energy

Trade ID: T-1002

Confirmation Number: CNF-T-1002

Commodity: Henry Hub Natural Gas

Delivery Window: 2026-06-01 to 2026-06-30

Volume: 1250 MMBtu/day

Price: 3.40 USD/MMBtu

Purpose: Force a PDF above the inline threshold so the OpenAI Files API path is exercised.

The semantic content is intentionally compact so the fixture validates file upload transport without inflating the model context window.

Appendix

Uploaded-file smoke fixtures use deterministic byte padding after the PDF EOF marker.
That keeps the document readable while pushing the file over the inline threshold.
